

EUMICON Digital Conference „Recovery. Made In Europe”
18 November 2020, 14.30 - 17.00*

EUMICON invites you to join the digital conference “Recovery. Made In Europe” (18.11.2020) organized in partnership with the European Commission. The conference aims to discuss how strengthening the EU’s strategic autonomy can help lessen the effects of the COVID-19 crisis with high-level stakeholders from politics, industry, NGOs and academia. It will bring the EU recovery program, circular economy, green transformation and the importance of resilient value chains for the European economy into focus. Other topics that will be touched upon are the need for increased quantities of mineral raw materials and how the EU must ensure the security of supply, which match the projected demand of the European industry.

This year it’s all about one question:
How can we make Europe’s economy more resilient?

Let’s shape Europe’s future together!

[Register now](#)

*(With regards to the ongoing development of COVID-19 security measures we cannot rule out short-term changes of the program).
